## Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

In interpreting the claims in light of the Specification and the applicants' arguments, the examiner finds the claims to allowable over the prior art. The prior art of record fails to teach either alone or in combination a bandwidth boost system and method wherein a first data set is transmitted over a wireline communication path from an internet service provider to a client, and a second data set is transmitted in addition to the first data set over a wireless communication path which extends from the client to a cell site coupled to a mobile telephone switching office further coupled to the internet service provider. See Remarks of December 15, 2004, page 9, lines 16-25.

Agraharam et al. teaches a system for providing an enhanced grade of service for connections over a large network. Agraharam, however, teaches that an IP network is supplemented to increase bandwidth by use on an additional ISDN connection, from the destination server to the ISP. Agraharam does not explicitly teach the use of a wireless cellular connection to supplement a wireline communication path to increase bandwidth from the client to the ISP. See Remarks of May 26, 2005, page 6, lines 10-30.

McAlinden teaches the invention substantially as claimed. McAlinden teaches a method and terminal for high bandwidth cellular data transmissions wherein additional cellular connections are assigned to a terminal in order to increase bandwidth of that terminal from an ISP to the client. However, McAlinden does not explicitly teach supplementing a wireline connection with a wireless cellular connection in order to increase bandwidth. McAlinden is

Application/Control Number: 09/752,210

Art Unit: 2141

limited to a wireless cellular connection supplementing another wireless cellular connection from an ISP to a client.

## Information Disclosure Statement

The information disclosure statement (IDS) submitted on January 23, 2001 and January 29, 2002 include references to co-pending application serial nos. 09/304,185 and 09/699,919, respectively. The applicant, however, did not list these applications on form PTO-1449. Therefore, although the copending applications are part of the record, they will not appear in the face of the patent. As a courtesy to the applicants, the co-pending applications have been considered by the examiner.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul H. Kang whose telephone number is (571) 272-3882. The examiner can normally be reached on 9 hour flex. First Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rupal Dharia can be reached on (571) 272-3880. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
